

Role Walkthrough Guide: Department Manager

Operations & Team Leadership Manual

NOTE: ****Role Designation:**** `manager` (Operations Manager / Department Head) ****Primary Purpose:**** Cross-functional team supervision, capacity management, leave administration, department asset governance, and operational reporting. ****Supported Entities:**** KGAC & KPL

1. Role Scope & Key Responsibilities

As a **Department Manager**, you hold operational oversight over your assigned department (e.g., *Operations, Engineering, Audit Support*). You ensure optimal resource utilization, timely leave processing, asset custody compliance, and project budget adherence.

Summary of Responsibilities

- Capacity & Resource Allocation:** Balance workloads across department team members using the interactive calendar grid.
 - Leave Management:** Act as the primary approver for team vacation, sick, and personal leave requests.
 - Department Asset Custody:** Authorize equipment checkouts, verify physical condition upon return, and confirm returns to clear employee liability.
 - Project Administration:** Configure department projects, assign team members, and designate billable vs non-billable codes.
 - Timesheet Governance:** Enforce 100% weekly timesheet completion and resolve idle days.
 - Operational Analytics & Exports:** Monitor utilization charts and export department records in CSV and Excel formats.
-

2. System Access & Navigation Overview

NAVIGATION ITEM	ROUTE	KEY PURPOSE
Calendar	<code>/calendar</code>	Department-wide allocation grid with bulk copy and quick-fill tools.
Audit Planner	<code>/planner</code>	Multi-team schedule builder and resource capacity balancing.
Dashboard	<code>/dashboard</code>	Department utilization charts, idle days table, and overdue asset alerts.
Internal Assets	<code>/assets</code>	Borrow approvals, physical return confirmations, and department history exports.
Audit Margins	<code>/reconciliation</code>	Margin reconciliation and project cost analysis.
Completion	<code>/completion</code>	Team timesheet compliance tracker (Missing, Submitted, Mismatch).
Expense Billing	<code>/billing</code>	Review reimbursable project expenses and contractor billing.
Man-Days	<code>/man-days</code>	Billable vs non-billable man-day breakdown.
Projects	<code>/admin/projects</code>	Create projects, assign codes, colors, and configure team members.

3. Step-by-Step Operating Procedures

3.1 Managing Department Workload on Calendar

1. Navigate to **Calendar** (`/calendar`).
2. Filter the view by your Department name.
3. Review team rows for:
 - **Over-allocation**: Highlighted in amber when daily hours exceed 8 hours.
 - **Under-allocation (Idle Days)**: Highlighted in red (`IDLE`).
4. To assign staff to ongoing engagements, click on any empty cell, select the project, enter 8 hours, and save.
5. Use **Copy Previous Week** to roll forward standard schedules.

3.2 Reviewing & Approving Department Leaves

1. Access the **Leave Approvals** queue.
2. View pending requests submitted by department staff.

3. Inspect the employee's historical leave balance and current project commitments.
4. Click **Approve** or **Reject**. The decision instantly updates the employee's calendar and sends a notification.

3.3 Equipment Custody & Return Verification

1. Open **Internal Assets** (`/assets`).
2. Under **Pending Approvals**, review gear checkout requests from your staff. Click **Approve**.
3. When an employee returns gear:
 - Receive the physical device in the office.
 - Inspect screen, casing, battery, and accessories.
 - Go to **Pending Approvals** tab.
 - Click **Confirm Return** on the employee's return request.
 - The asset is immediately marked `Available` in the central inventory.

3.4 Monitoring Idle Days & Timesheet Completion

1. Review the **Idle Days Table** on the Dashboard (`/dashboard`).
2. Team members with unallocated workdays will be listed alongside their idle hours.
3. Navigate to **Completion** (`/completion`) to review the submission status of all department members before weekly payroll cutoff.
4. Export the completion report in Excel or CSV to follow up on outstanding timesheets.

Target File: `../screenshots/SS20_timesheet_completion_tracker.png`

3.5 Managing Department Projects

1. Navigate to **Projects** (`/admin/projects`).
 2. Click **Create Project**.
 3. Enter Project Name, unique Project Code (e.g., `MKTG-2026` , `OPS-MAINT`), and choose a identifying color.
 4. Set whether the project is `Billable` or `Internal` .
 5. Open the **Project Team Modal** to restrict project allocation to specific department members.
-

4. Managerial Best Practices Checklist

- [] **Monday Planning:** Review the weekly schedule every Monday morning to eliminate idle gaps.
 - [] **Prompt Leave Processing:** Approve or reject leave applications within 24 hours of submission.
 - [] **Asset Return Discipline:** Never confirm an asset return in the software without physical inspection of the hardware.
 - [] **Department Payroll Sign-off:** Sign off on timesheets every Friday by 5 PM.
-
