

Role Walkthrough Guide: Backend Staff

Backoffice Operations & Support Manual

NOTE: ****Role Designation:**** `backend\_staff` (Backend Operations / Data Entry / Audit Support Staff) ****Primary Purpose:**** Backoffice operations, audit data verification, inventory data processing, internal support, and daily timesheet reporting. ****Supported Entities:**** KGAC & KPL

1. Role Scope & Key Responsibilities

As a member of the **Backend Staff**, you perform essential operational support that keeps audit engagements running smoothly. You handle data entry, audit document indexing, preliminary reconciliation, and internal project coordination.

Summary of Responsibilities

- 1. **Daily Work Logging:** Record your daily support hours accurately on the Calendar (minimum 8 hours daily).
- 2. **Backoffice Project Allocation:** Categorize hours under relevant internal codes (e.g., *Data Verification, Report Formatting, Internal Ops*).
- 3. **Office Asset Management:** Manage any company equipment or IT peripherals in your possession.
- 4. **Leave Compliance:** Submit leave applications in advance through the platform.
- 5. **Operational Verification:** Assist managers and planners in cross-verifying store count sheets and documentation.

2. System Access & Navigation Overview

NAVIGATION ITEM	ROUTE	KEY PURPOSE
Calendar	<code>/calendar</code>	Weekly timesheet grid to log daily work hours against internal and client support codes.
Dashboard	<code>/dashboard</code>	View personal allocation summary, department notices, and asset return reminders.
Internal Assets	<code>/assets</code>	Request borrowable equipment and track currently held hardware.
My Profile	<code>/profile</code>	Manage contact information and update account passwords.

3. Step-by-Step Operating Procedures

3.1 Authentication, Registration & Onboarding

Backend operations team members access the platform via:

- **Sign In with Google:** Click "Sign in with Google" with your authorized company email.
- **Username & Password:** Click "Username & Password", enter username (without domain) and password.
- **Create Account (New Staff):** Register via "Don't have an account? Sign up". Newly registered accounts display **Account Pending Approval** until assigned the `backend_staff` role by an Administrator.
- **Entity Confirmation:** Confirm KGAC or KPL on first login.

3.2 Logging Daily Support Hours on the Calendar

1. Log into the platform: `https://kgac-allocation.vercel.app`.
2. Navigate to **Calendar** (`/calendar`).
3. Locate your personal row for the active work week.
4. Click the cell for today's date.
5. In the popover:
 - **Project:** Select the appropriate project (e.g., `INTERNAL-OPS`, `DATA-REVIEW`, or the specific client code if doing dedicated data entry).
 - **Hours:** Enter `8.0` for a standard workday.
 - **Status:** Select `internal` for general office operations, or `billable` if working directly on dedicated client deliverables.
 - **Notes:** Add a short summary of completed work (e.g., "Verified 14 store count sheets for Reliance Retail").
6. Click **Save**.

3.2 Submitting Leave & Time Off

1. When requesting leave (planned vacation or sick days):
2. Click the calendar date cell.
3. Select `pto` or `sick`.
4. Enter brief notes explaining the absence.
5. Click **Save**. The request routes immediately to your Department Manager.

3.3 Equipment Custody & Handover

1. If you need a testing tablet, spare barcode scanner, or power bank:
2. Open **Internal Assets** (`/assets`).
3. Browse **Available Equipment** and click **Request / Borrow**.
4. Specify dates and purpose.
5. When finished, open **My Held Assets** and click "Mark as Returned" before handing the device back to the office manager.

4. Backend Operating Standards Checklist

- [] **Daily Submission:** Log hours before ending your shift at 6:00 PM.
- [] **Accurate Project Tagging:** Ensure client-specific data entry is tagged with client project codes, not generic internal codes.

- [] **Asset Return Discipline:** Never keep equipment past the due date without submitting an extension request.
